

Oruno Awhie

FULL-STACK WEB DEVELOPER (REACT & PYTHON)

📍 Nigeria (Open to Remote) 📞 +234 915 5541159 ✉ oruno@example.com 🌐 www.drakemarho.com 📁 github.com/oruno

SKILLS & EXPERTISE

FRONTEND

React.js Tailwind CSS
JavaScript (ES6+) HTML5 CSS3
PWA Development

BACKEND & CLOUD

Python Django Firebase (Firestore)
Auth Hosting) Render
PythonAnywhere

DESIGN & TOOLS

Adobe Photoshop Figma
Git/GitHub CI/CD workflows
JSON/API Parsing

METHODOLOGIES

Modular Architecture
Website-as-a-Service (WaaS)
Component-Driven UI

EDUCATION

Diploma in Computer Science

Petroleum Training Institute
Sep 2021 — May 2025

PROFESSIONAL SUMMARY

Results-driven Web Developer (WaaS Specialist) with over 2 years of experience building scalable, full-stack applications. Expert in crafting responsive, app-like user interfaces with React.js and Tailwind CSS, paired with robust back-end integrations using Python, Django, and Firebase. Proven track record of delivering production-ready Progressive Web Apps (PWAs), optimizing deployment workflows, and building modular architectures for SMEs.

PROFESSIONAL EXPERIENCE

Front-End Developer

2025 — Present

Remina App

- Spearheaded the front-end development of a Progressive Web Application (PWA) dedicated to seamless photo management and media sharing.
- Engineered a highly responsive, app-like user interface using React, focusing on optimized image rendering and smooth state management.
- Collaborated with backend teams to consume APIs, ensuring cross-device compatibility and secure media handling in a production environment.

Founder / Full-Stack Developer

Jun 2024 — Present

Code and Canvas (WaaS Agency)

- Established a productised Website-as-a-Service (WaaS) offering targeting SMEs, managing end-to-end delivery from discovery to launch.
- Developed a reusable React component library and theme system, speeding up client site customization and reducing average build time by 50%.
- Maintained live deployments and monitoring on Render and PythonAnywhere, performing regular updates and security patches.

Freelance Web Developer

Mar 2024 — Aug 2024

Independent Contracts

- Delivered bespoke websites for local businesses including booking and portfolio features; responsible for design, full-stack development, and hosting.
- Applied Adobe Photoshop and branding skills to produce cohesive visual assets across multiple client web platforms.

KEY PROJECTS & ACHIEVEMENTS

Lois Braid

🔗 <https://www.loisbraid.com>

React Tailwind CSS Python/Django

- Architected a dynamic, full-stack web application featuring a highly interactive frontend and a secure, scalable Django backend.
- Implemented custom API endpoints for dynamic content delivery and optimized frontend rendering for high Lighthouse performance scores.

Enterprise Document Automation Engine

🔗 Internal Tool

Python JSON Jinja2 WeasyPrint

- Engineered a dynamic PDF generation system capable of transforming raw JSON data into legally compliant, perfectly styled contracts and invoices.
- Automated the calculation of financial balances and multi-currency formatting, reducing manual drafting time by over 95%.

Modular Hospitality Web Application

 [Independent Project](#)

[React](#) [Firebase \(Firestore\)](#) [Auth](#)

- Built a scalable web application for hotels and eateries, featuring multi-tenant templates and an admin dashboard for rapid property onboarding.
- Integrated real-time booking workflows and media galleries to improve guest conversion and management.

Prime Portfolio Platform

 <https://primeportfolio.pythonanywhere.com>

[HTML](#) [CSS](#) [Tailwind](#) [Django](#)

- Built a dynamic portfolio generation platform leveraging Django to allow users to securely update content and manage layouts in real-time.
